

Title: Biologist

Location: Turlock, CA

Position Description: River Partners' Turlock office is looking for qualified Biologist to join our team!

The Restoration Biologist works with the Senior Biologists and Ecologists to identify, evaluate, implement and complete restoration activities. As a result of this persons efforts, River Partners will be able to advance its mission and work on projects.

Some of the Essential Functions and Responsibilities include:

- Collecting and monitoring experimental data, entering data into computer databases, completing analyses of information and reporting.
- Completing site specific restoration plans, permits, and project progress reports.
- Assisting in translating the site specific design across the project area for implementation.
- Working on educational activities for the public, as well as attending public events to promote the organization and its mission.
- Developing and delivering presentations to the scientific community and the public.
- Developing and maintaining good relations with agency personnel, contractors, and neighbors.
- Working long hours and/or weekends in a variety of field conditions.
- Traveling to multiple restoration projects for planning and monitoring, which may include, which may include River Partners' other branches.
- Performs other assignments from time to time as requested by the Sr. Ecologist to achieve department and company business goals.
