

Title: Ecological Restoration Summer Internship

Dates: 6/2020 through 8/2020

Duration: 8 weeks

Location: Chico CA

Salary/Rate: Full time \$13/hr

Position Description:

River Partners' Chico office is looking for qualified students to help us at our habitat restoration projects on the Sacramento and Feather Rivers. Summer interns spend time hiking outdoors collecting and analyzing plant and wildlife data which helps us design better habitat restoration projects in the future.

This position entails long strenuous days monitoring vegetation in the Central Valley heat, data entry and management, and a self-directed research project pertaining to riparian restoration. To qualify, you must be a student working towards a degree in biology, natural resources or related field.

This is a paid opportunity for eight weeks over the summer of 2020. Successful employment through this position provides a great opportunity to learn about large scale horticultural restoration, vegetation monitoring techniques, riparian ecology, GIS software and riparian plant and animal identification. 40 work weeks will be expected and early morning workdays starting at 6 am are not uncommon for this position.

We will be accepting applications until April 30, 2020. Start dates for the position are flexible. Please submit a cover letter, resume, and contact information for three references in a single word document saved with applicant's last name to: Jobs@riverpartners.org

If you are interested in applying or want to learn more, please visit our website:
<http://riverpartners.org>

Qualifications:

Intern must be a student pursuant of a degree in biology, natural resources or related fields. Must be eligible to work in the United States with a valid driver's license. Successful applicants must possess the ability to ambulate over rough terrain often in summer temperatures exceeding 90 degrees (F). Successful applicants must also have the ability to take direction, work independently, possess a strong work ethic, and maintain a willingness to learn and a desire to gain experience. Strong verbal and written communication skills are a must. Preference will be given to applicants who have knowledge of native and invasive riparian plants and wildlife, experience with handheld GPS units and GIS software, and experience with data entry (using excel, ArcPad, ArcGIS) and management. Previous field experience is desirable, but not required.

To apply email your resume, cover letter and 3 references to:
